

MEET THE ALL-ELECTRIC HYPER SUV

ELECTRE

BEAT

The all-new and all-electric Lotus Eletre is a striking and progressive Hyper SUV. It takes its core principles and Lotus DNA from more than 70 years of sports car engineering, evolving them into an all-new lifestyle car.

Eletre has an elegant and exotic look, with active aerodynamics and a dramatic porous design. The pioneering use of sustainable materials sets new standards of premium for every single journey.

THE

RULES

REBEL

HYPERSUV

Eletre's proportions are defined by hypercar principles and advanced aerodynamics, for driver handling and comfort. And the iconic front design showcases its sportscar DNA.

POROSITY

7 sets of aero ducts channel air through and over the bodywork, optimizing speed, handling, and vehicle dynamics.

ADVANCED INFOTAINMENT

The multimedia interior boasts 23 KEF speakers, a 15.1 inch central control screen, 9 inch rear foldable screen, and an integrated Augmented Reality 29 inch head-up display.

CONNECTIVITY

Stream and navigate using high-speed 5G capabilities and update

your Eletre via over-the-air technology.

SAFETY FEATURES

34 individual sensors feed into 5 perception systems, for smart situational awareness, with your safety in mind.

PERFORMANCE

Active aerodynamics generate next-level downforce. The Eletre is one of the world's fastest dual-motor SUV, hitting 100KPH in 2.95 seconds, joining the very exclusive 2-second club.

CHARGING AND RANGE

Ultra-high speed charging unlocks 400km (WLTP*) driving range in just 20 minutes, with an estimated total range of 600km (WLTP*).

Based on estimated WLTP (combined) figures, final homologation and consumption measurement of the country version will take place immediately before the market launch. Charging speed and charging time may be affected by temperatures and weather conditions. | Images show optional equipment. | The images used on this page are of a vehicle used for promotional purposes only.
